

IES New Jersey, Montclair Section January 17th 2012

## Architectural Lighting and DMX Controls

City Theatrical factory tour

Question: What does theater lighting have to do with me?

Answer: More than you think!

As the lines continue to be blurred between architecture and entertainment, it becomes necessary for architectural lighting designers, engineers and manufacturers to understand all of the options out there for controlling increasingly more complex lighting systems.

Join the IES New Jersey Section for a tour of the City Theatrical factory and a presentation focusing on wired and wireless DMX technology for architectural applications. Our hosts and presenters include City Theatrical's Gary Fails, Larry Dunn and Paul Kleissler, the authors of U.S. Patent 7,432,803 for wireless RDM and ACN.

City Theatrical, Inc., is a manufacturer of theatrical and architectural lighting accessories and the winner of 31 product and business awards. They have offices in Carlstadt, New Jersey and London, England.

**Date:** January 17, 2012

**Time:** 6:00 PM for Schmoozing, sandwiches and soft drinks

**Tour:** 6:30 PM (sharp)
